

Process Liquid Filtration Band Filters

Norafin Crystalen[®] - High Performance Filtermedia

Filtermedia's structure that fits to your best technico-economic needs

- hydro-entangled filtermedia or needled filtermedia

High flow rates up to 2000l/min

- with 100% Polyester fibres or Polypropylene
- with viscose fibres for higher hydrophilic properties

Filtration rates from 250µm to 15µm

Strong and stable during handling and operation

Typical product range:

100% Polyester Needled filtermedia	Filtration rate µm		
N96 090 500 90gsm	180 - 250		
N96 115 500 115gsm	120 - 180	30% Viscose/ 70% Polyester spunlaced	Filtration rate µm
N96 150 500 150gsm	80 -120	S83 055 003 55gsm	120
N96 300 500 300gsm	60	S83 090 003 90gsm	90
N96 450 500 450gsm	30-60	S83 120 003 120gsm	60

Typical application :

- gravity, hydrostatic and depression filters
