

Declaration of principle according to DIN EN ISO 50001:2018

As a manufacturer and supplier of innovative nonwoven solutions for use in industry, construction, filtration, protective clothing, cleaning, and composites, Norafin Industries (Germany) GmbH is committed to using energy consciously and efficiently in the production of our products.

We strive for a responsible approach to energy resources in line with our Energy Policy.

To fulfill this commitment:

- ✓ We comply with legal requirements.
- ✓ We measure and analyze the consumption of the types of energy used and energy input.
- ✓ We define, analyze, and document our manufacturing processes.
- ✓ We develop measures for the continuous improvement of energy efficiency.
- ✓ We provide the necessary resources to achieve our energy goals.
- ✓ We involve employees at all levels in achieving our energy goals.
- ✓ We ensure our processes and analyses are transparent.
- ✓ We seek out and purchase energy-efficient products and services that support our energy goals, taking economic criteria into account.
- ✓ We regularly review the measures for implementing our Energy Policy and adapt them to current conditions.

The Energy Policy is reviewed annually for accuracy and effectiveness and revised accordingly.

As part of the Energy Management System, key performance indicators (KPI) are used to increase our energy efficiency, in order to break down, analyze, and better understand our processes.

Our goal is to make our energy consumption more efficient, both operationally and strategically.
